

Illusion Game

In this game of speed and reflex, you will need to make **visual judgments** (for instance, which circle is the biggest, or which line is the longest), as fast and as correctly as possible, while **resisting different visual illusions**.

We are going to start with some examples of all the illusions you will encounter in the game.

Start the practice!

Training Completed

In the next phase, there will be more trials, and some might be harder too.

Moreover, after each illusion block, a **score** will be calculated based on speed (time you took to answer) and accuracy (number of errors).

Try to keep up a high score!

Note that it can be *really* challenging at times, so you will need to rely on your **intuition** and gut feeling to answer as fast as you can without making errors.

Each illusion block will be repeated two times (so that you have the opportunity to improve your score), but the order of the blocks is random.

Remember, your goal is to be as **fast** and **accurate** as possible. Good luck!

Let's Play!
